

(Catalogue updated 16th July 2010) Bromeliad SEED

If you purchase seed & do not get reasonable germination? Email me and receive a credit or refund for any seed that does not perform.

In Recent months orders to Sydney, Melbourne & Brisbane have gone missing so now will have to **charge \$2.80 to all Australian orders**, for registered mail to avoid disappointment (it is a pity this is the case).

Postage with in Australia; \$3.00 up to 8 pkts., + \$2.80 registered post.
Postage international; \$5.00 Aus ORDINARY AIR-MAIL up to 8 pkts.

Due to varying import requirements of many countries, **will not be sending seedlings or plants overseas**, only seed & this will depend on the importer of the seed, checking that there are no restrictions for bromeliad seed to their country.

“F2 crosses”? By this I mean that a cross of the plants listed in the **POD PARENT** column were crossed with sibling plants (i.e. sibling; another plant from the same parents) & will be shown with the notation **F2** in the **POLLEN PARENT** column

In the Neoregelia, some seed crosses are marked with *, this implies that this seed was designed to produce seedlings with dramatic colourful top foliage on flowering or a % of seedlings with foliage variegation (white or cream stripes in foliage).
